

mywirecard MasterCard

mywirecard MasterCard, a product of Wirecard Bank AG, gives consumers access to easy and secure online payment with several million retailers worldwide.

Immediately after registering with www.wirecard.com, the consumer obtains an account with Wirecard Bank that he or she can top-up by transfer and with cash at the POS in 20,000 shops. Topping up with cash: print out barcode, go to gas station, load and then pay online.

In the instant that the mywirecard account shows a credit balance, the customer is issued a "virtual" MasterCard. This consists of the primary credit card information required for an online purchase.

Using the virtual MasterCard associated with the account, registered users can send money to other holders of the same product. mywirecard offers a fast, efficient and globally available alternative to traditional transfers or sending checks.

In addition the user has the option to request a physical mywirecard MasterCard. It automatically replaces the virtual MasterCard and provides a user the option to buy in stores the world over at a total of more than 24.7 million acceptance points.

AT A GLANCE
