

CARD PAYMENTS ONE INTERFACE

Wirecard provides solutions that enable smooth processing of card payments in retail. The benefits:

- ▶ Use of all major credit and debit cards
- ▶ Effective risk management concepts
- ▶ Secure data transmission and processing
- ▶ Low processing costs
- ▶ Highest availability – also during peak periods

Using standardised interfaces, Wirecard makes the efficient incorporation of electronic card payments possible for merchants around the globe. As an international payment service provider Wirecard works with all renowned credit card organisations and financial service providers worldwide.

Credit and debit cards form the most popular payment methods in domestic and international B2C payments today. For merchants, this means new sales and customer potential – but it also means risks.

Which is why merchants and financial institutions have high requirements regarding efficient risk management, data security and system availability. A leading provider of integrated concepts for electronic payments, Wirecard offers full service of the highest standard, also in credit card processing.

As an international payment processor Wirecard works with all renowned credit card organisations and numerous acquirers. Employing a standardised interface, Wirecard offers merchants from around the globe efficient access to a system that is notable for its payment processing and extensive fraud protection.

Based on the latest security technologies, this platform fulfills all requirements imposed by the credit card organisations including PCI certification, and supports the processing of additional industry-specific data from the airline, hotel and car rental industries.
