**Skrill Digital Wallet is one of the largest payment systems in the world and enables any registered customer to make online payments conveniently and securely, as well as sending and receiving money transfers by simply using just an email address. With Skrill Digital Wallet Wirecard offers merchants the possibility to use a fast, secure and cost-effective payment solution to increase revenue and conversion.**

All customers with a registered Skrill Digital Wallet account can make instant payments to more than 20,000 online shops worldwide that accept Skrill as a payment option. As soon as the customer selects Skrill Digital Wallet on the merchant payment page he is transferred to Skrill Digital Wallet website to login into his personal account with Wallet email address and password. He simply chooses a payment method he wants to use and confirms the payment. Upon completion, he will be returned to the shops' website and the merchant receives an instant notification about the successful payment.

Consumers can on the one hand side top-up their Wallet by using several local payment methods, or can register regular credit or debit cards, as well as bank accounts.

As the payment is pushed by the consumer to the merchant, there is only a low chance of reversal, although chargeback's can occur if credit cards or direct debits have been used.
