Wirecard and AMETRAS develop payment app for Möbel Inhofer

- **Customers can pay for furniture deliveries right on their doorstep**
- **Wirecard provides payment software and handles payment processing**

Aschheim (Munich). Wirecard, one of the leading payment service providers, and AMETRAS, a global IT and software provider, have announced a cooperation in the field of mobile payment. Together, the companies are bringing to market a payment app for Europe's largest furniture and furnishings store Möbel Inhofer. Using the app, furniture couriers can take payments on the customer's doorstep. This means that Möbel Inhofer customers have the possibility of paying a deposit for their goods immediately upon purchase, before using this technology to settle the remaining balance upon delivery – either via a simple card payment (Visa or MasterCard) or direct debit.

The mobile payment solution is based on a combination of an app and an mPOS device which works in conjunction with mobile end devices such as tablets and smartphones. The app allows couriers to see at a glance exactly how much the customer still has to pay. Wirecard provides all payment software and is responsible for payment processing to facilitate this. Wirecard and AMETRAS are therefore enabling the innovative retailer Möbel Inhofer to expand its value-added chain.

More than 45,000 users work with AMETRAS IT solutions on a day-to-day basis and the company has over 500 customers in Germany, Austria, Switzerland and other European countries. Bernd Röhl, Managing Director at AMETRAS, comments on the new collaboration with Wirecard: "It is our aim to support our customers and meet their needs exactly with tailored IT solutions. Our objective is to offer Möbel Inhofer's customers a flexible and secure shopping experience using the app. Wirecard, as a leading payment and technology provider with long-standing experience in the field of mobile payment, is an ideal cooperation partner".

Christian Reindl, Executive Vice President Sales Consumer Goods at Wirecard, adds: "We are pleased to support Möbel Inhofer in providing their customers with an innovative and convenient shopping experience. This app is an active response to the steady increase in the furniture segment's sales volume over recent years. Customers increasingly want their purchase experiences to be more flexible and tailored to their needs. At the moment, this trend is particularly evident in Germany. For this reason, user-friendliness and providing customers with a simple and secure payment process were central elements of the app development process".
